Brustor Sliding Panels

Flexibility in every detail

Brustor Sliding Panels

Flexibility in every detail

Turn your patio cover into a space that adapts effortlessly to every moment. Brustor sliding panels combine a sleek, architectural design with extra shelter and privacy. Simply slide the panels to the desired position and create exactly the atmosphere and openness you're looking for.
With the 3-rail system, up to three panels slide behind one another for a maximally open view. Closed, they form a wall up to 6 metres wide for extra privacy and shelter. The sliding panels are available for all Brustor pergolas and can also be easily added afterwards.

FIX – fixed slats
The Brustor sliding panels FIX have fixed slats and give every patio cover a warm, refined look. Choose the natural charm of thermally modified poplar wood or low-maintenance lacquered aluminium, available in various colours and as a stylish woodlook finish.
This way you match the sliding panels perfectly to the architecture, the patio cover and the desired atmosphere.

FLOW – tiltable slats
With the Brustor sliding panels FLOW, you decide for yourself how much light, privacy and shelter you want.
The tiltable aluminium slat fields adjust easily to the conditions, turning every panel into a dynamic part of your outdoor space. Open them for more light and view, or tilt the slats for extra privacy and shelter: FLOW gives you the freedom to shape your outdoor comfort exactly as you wish, at any moment.

Fixed wall
Both the FIX and FLOW panels can also be installed as a fixed wall. In this case, the panels do not slide and can, for example, be used as a partition for an outdoor kitchen or provide permanent privacy.

Advantages

- Smoothly sliding panels
- Privacy, ventilation and light exactly as you wish
- Slide the panels exactly as you want, thanks to the 3-rail system
- Up to 6 panels per wall
- Premium, low-maintenance choice of materials
- Fitted as standard with a spring-loaded plastic guide that can compensate for height differences of up to 5 cm

Floor-Guide

This spring-loaded floor guide compensates for level differences of up to 5 cm, so the patio floor doesn't need to be perfectly level. The Floor-Guide is supplied as standard on both Fix and Flow.

	Fix	Flow
Slats	Fixed	Adjustable
Light & ventilation	Fixed	Adjustable
Privacy	Fixed	Adjustable
Number of slat fields	1 slat field	2 slat fields

Standard colours frame and aluminium slats	RAL7016 ST RAL7039 ST RAL9005 ST RAL9016 ST	RAL7016 ST RAL7039 ST RAL9005 ST RAL9016 ST
Rail system	2- or 3-rail	2- or 3-rail
Floor-Guide	Standard	Standard
Panel width	min. 500 - max. 1450 mm	min. 500 - max. 1200 mm

Fix

A Fix panel consists of fixed slats that are not adjustable. It provides more privacy and extra shelter on changeable days. The slats are available with a warm, refined look in thermally modified poplar wood or as low-maintenance lacquered aluminium.

Flow

A Flow panel has two separately operable slat fields with adjustable slats. You operate each field simply by tilting one slat; the other slats in that field move automatically along with it. This way you adjust the top and bottom sections separately for light, ventilation, privacy and shelter.
